

Dei Fratelli® Sustainability

Keeping Dei Fratelli Brand Tomatoes Your Trusted Tomato Product

Local Family Growers

We continually support our trusted, local family growers. These growers take great care to ensure that our tomatoes continue to be high quality.

Reducing Water Usage

Water used to remove tomato peels is reused to wash tomatoes when they first arrive to one of our facilities.

Reusable Transport Packaging

Larger customers receive reusable transport packaging to reduce costs for customers as well as improve sustainability in industrial packaging.

Composting

We use our own tomato skins and cabbage trimmings to make our own compost through Hirzel Canning Company and Farms Composting Facility.
